

## **7270.VC introduces the Strategic Scale-Up Tracker to transform long-term Investment Sovereignty Beyond the VC/PE Cycle**

February 01, 2026 – Davos, Switzerland – 7270.VC, an investor network connecting family offices, super angels, sovereign wealth funds, and Finance Ministers with critical infrastructure opportunities, today introduces the Strategic Scale-Up Tracker. This initiative aims to enable structured investments in start-ups and scale-ups, support strategic market expansion, and remove the constraints of the traditional private equity fund wrapper, thereby enabling investors and nations to build long-term strategic advantage.

The global private market has faced a deepening structural contradiction for years: the mismatch between the multi-decade horizon required for nation-building and the short-term liquidity pressures of the 7-to-10-year PE fund cycle. The current geopolitical climate, characterized by the race for technological sovereignty and supply chain independence, underscores the urgent need for a new model in capital allocation.

Supported by a consortium of global experts and veteran investors, the tracker's approach departs from the "blind pool" fund model. Instead, it utilizes a curated structure in a securitized, dynamic exchange-listed tracker that allows investors to hold high-growth assets without the pressure to liquidate.

To ensure flexibility and precision, the Strategic Scale-Up Tracker can be configured based on 1:1 direct equity investments or via synthetic replication. This architecture supports multiple thematic domains – such as AI and Fintech – as well as strategic country-specific mandates, simplifying public-private partnerships and enabling timely, coordinated investment execution.

### **The Path Forward**

We invite institutional leaders and sovereign partners to join us in architecting national strategic investments. Whether the priority is AI, Defense, Fintech, or Healthcare, our syndicate allows for tailored exposure to the sectors that define (national) resilience. We welcome a dialogue on how we can co-create these strategic trackers to align with your long-term goals, notably at the upcoming Web Summit Qatar 2026.

### **About 7270.VC**

Originated in Davos, 7270.VC is an investor network dedicated to connecting family offices, UHNWIs, and super angels with exceptional global opportunities in AI, tech, media, and beyond. Other notable investments include the TAM Film Fund and TensorBees.ai, an AI advisor that delivers end-to-end solutions - from building bespoke apps and specialized LLMs to helping organizations refine and implement their AI strategy. For more information on the Strategic Scale-up Tracker or to inquire about partnership opportunities, please visit <https://7270.vc>.
