

Wittify AI to Showcase Enterprise-Scale Conversational Intelligence at Web Summit Qatar 2026

DOHA, QATAR — February 1, 2026 — [Wittify AI](#), a global innovator in multilingual, enterprise-grade conversational AI, today announced its strategic presence at **Web Summit Qatar 2026**, taking place from **February 1–4** at the **Doha Exhibition and Convention Center**.

At the Summit, [Wittify AI](#) will demonstrate its next-generation AI agents engineered to transform customer engagement across **voice, chat, and omnichannel touchpoints**. Unlike experimental pilots or proof-of-concept deployments, Wittify’s solutions will showcase **proven, production-grade capabilities**, delivering operational resilience, enterprise security, and scalable performance for global organizations.

[Wittify AI](#)’s participation marks a pivotal step in accelerating **AI-powered customer experience (CX)** adoption across the Middle East, North Africa, and international markets. Attendees will experience Wittify’s **low-code / no-code operational platform**, enabling enterprises to deploy culturally localized, emotionally intelligent AI agents in minutes rather than months, without compromising governance or control.

“Modern enterprises require more than automation; they need intelligence that is trusted, scalable, and human-centric,” said **Nader El-Batrawi**, Founder & CEO of [Wittify AI](#). *“At Web Summit Qatar, we are demonstrating AI built for real operational complexity and linguistic diversity. Our agents don’t merely respond, they understand intent, execute workflows, and deliver measurable business outcomes.”*

Highlights at Web Summit Qatar 2026 include:

- **Live Production Demonstrations**

Real-time showcases of AI agents managing complex workflows: customer support, sales qualification, bookings, and post-service engagement, seamlessly across voice and chat, and digital channels.

- **Platform Advancements**

The unveiling of enhanced multilingual capabilities with deep dialect support, adaptive emotional intelligence flows, and robust enterprise-grade architecture integrations.

- **Strategic Engagement**

Executive-led discussions with government entities, startups, and enterprise leaders on deploying secure AI infrastructure in high-compliance environments, including fintech, healthcare, and the public sector.

- **Thought Leadership**

Exclusive briefings on the evolution of agentic workflows, data sovereignty, and responsible, enterprise-ready AI deployment.

[Wittify AI](#) will be exhibiting at **Stand E532**. Executive leadership and engineering teams will be available for **media interviews, technical deep dives, and strategic discussions** on the future of localized, ethical, and enterprise-scale conversational AI.

About Wittify AI

[Wittify AI](#) empowers enterprises and governments to deploy intelligent conversational AI that combines **human-level empathy with industrial-scale performance**. The platform enables organizations to build, customize, and secure multilingual voice and chat agents, without writing code. By integrating advanced natural language understanding, deep localization, and enterprise-grade security, [Wittify AI](#) drives operational efficiency while elevating customer experience at scale.
